

ART 34 AMDT

CLAIMS

1. Composition for topical application for the treatment of the psoriasis containing an alcoholic extract derived from human placenta as active principle, and an appropriate excipient.
2. Composition according to claim 1 wherein this derived alcoholic extract of the human placenta is constituted fundamentally by unsaturated fatty acids such as palmitoleic and oleic acids and poly-unsaturated fatty acids such as linoleic, arachinoidic and eicosietienoic acids.
3. Composition according to claims 1 and 2 wherein for each 100 grams of composition it contains approximately 59 ml of this alcoholic extract in an hydrosoluble excipient.
4. Composition according to claims 1 to 3 wherein it is a hydrosoluble gel.
